

## Is it time for a reporting revamp?

As your organization and the environment around it evolves, so do your disclosures and reporting requirements. Regular reviews of your Workiva processes are a good business practice and contribute to strong controls and a continuous improvement environment.

These reviews can also weed out overlooked manual processes that create tactical issues—including the kind that end up hitting your bottom line in the form of operational waste and inefficiency. (An added bonus? Doing your team a favor by eliminating repetitive, mundane tasks that aren't very motivating.)

### Discover technology excellence

Freeing up your people for value-added activities is but one goal when unlocking further automation potential in your reporting cycle.
